MYTH BUSTING AND HELPFUL INFO

Teenagers are like spiders - they are more afraid of you than you are of them

There is almost ALWAYS food involved

The biggest part of Youth Work is showing up consistently and listening

Youth Work is about sharing hobbies, having fun, learning and growing together

We don't answer lots of questions... we ask them - you don't need to be an expert and teenagers appreciate an honest 'I don't know, let's look at it together'

Young people won't remember what you taught them, they'll remember how you made them feel

We offer multiple opportunities every year for training, development and support

We need volunteers from every background. age, experience, skill set and temperament

(youth need both the silly, energetic fun and the calm/reflective space)
